⦿ PROLOGUE ⦿

Long a neutral haven for commerce, the peaceful floating city of Saraband lies trapped between the mighty rival kingdoms of the Republic and the Empire. In recent years sinister cults of masked monks, Byzantine political machinations, and strange and ancient magic have threatened to disrupt the delicate neutrality that this thriving city-state has always striven to maintain. Now, with the abduction of the Emperor from within the very walls of Saraband, the diplomatic crisis seems destined to explode into armed conflict. In desperation to prevent this quiet capital from becoming embroiled in a regrettable and profitless war, the call has gone out for a force of young warriors to stem the growing tide of unrest, a force dedicated to preserving peace in a dark age – a Shining Force.

GAME SYSTEM

Shining Force III features two main modes. When you set forth in the city of Saraband, the game is in Search mode, allowing you to meet and interact with other characters, shop for items and gather information.

As you make progress in your adventure, you are bound to encounter monsters, rogues and enemy forces intent on barring your way. When this happens, the game enters Battle mode, and a strategic, turn-based fight ensues.

After winning a battle, you are free to continue on your journey in Search mode. Should the enemy prove too strong and defeat you, you will find yourself recovering at the nearest house of worship, richer in experience, but missing half your gold.

THE SEGA SATURN

1. Set up your Sega Saturn[®] system as described in its instruction manual. Plug a Control Pad or 3D Control Pad (sold separately) into Control Port 1.

Note: *Shining Force III*[™] is for one player only.

2. Place the *Shining Force III* disc, label side up in the well of the CD tray and close the cover.
3. Turn on the TV or monitor and the Sega Saturn. The Sega Saturn logo appears onscreen. If nothing appears, turn the system off and make sure it is set up correctly before turning it on again.

Important: Your Sega Saturn CD contains a security code that allows the disc to be read. Be sure to keep the disc clean and handle it carefully. If your Sega Saturn system has trouble reading the disc, remove the disc and wipe it carefully, starting from the center of the disc and wiping straight out toward the edge.

Note: Press **A+B+C+Start** at any time to quit a game in progress without saving.

GAME CONTROLS

Note: For games using a Sega Saturn 3D Control Pad (sold separately), set the Mode Switch to ○ in order to play using the Analog Thumb Pad.

MITHRIL

“So you found yourself a mithril nugget and now you want to make something out of it. Fetch me my hammer and tongs! Mithril ore has properties that let a master craftsman (such as yours truly) forge items with special virtues and magical powers. Mithril smiths are a dying breed, so we can’t be found in just any Town in the land, and our services don’t come cheap. But if you run across a chunk of the good stuff, we’re always happy for a chance to demonstrate our art.”

CHURCH

Every Town has its house of worship, where a goodly priest ministers to the needs of his congregation. This holy man will record your progress in the church's data archives, promote the worthy to new classes, and even revive those fallen in battle and cure the poisoned, charmed and blind (for a nominal donation to the church coffers). Approach the altar and speak to the priest to call up the Church icon menu. Select icons as in the Town menu (page 8).

Select **Revive** to restore vitality to a fallen character. A small contribution to cover expenses is requested.

REVIVE

✠ BATTLE SYSTEM ✠

Traitors, fiends and conspirators stand poised to thwart your progress through the realm. When you encounter an enemy force, the game enters Battle mode. *Shining Force III* battles are turn-based. Each combatant moves and acts in order determined by Agility ranking (characters with higher Agility move first).

A character's battle turn follows the pattern shown below. After all the combatants have completed their turns, a new round of battle begins and the process begins again. The battle continues until you defeat the leader of the enemy force, your main character (Synbios) loses all HP, or you retreat from the fight through the use of an item or spell.

MOVE

The turn begins with the Move stage. The battle grid is divided into squares. Squares the active character can move to are highlighted at the beginning of the turn. Press the D-Pad to move the character, and **A** or **C** when you have finished moving. Press **B** before moving to enter Halo cursor mode (page 18), or to go back a step in the Move stage.

After the character has finished moving, the Battle Commands icon menu appears (see page 17). If the character has stopped with an enemy in range, it is possible to attack using a weapon, item or magic. If there is no enemy within range, the character can opt to use an item, cast a spell or simply end the turn without performing any actions.

ACT

✠ BATTLE COMMANDS ✠

The Battle Commands icon menu appears after a character has finished moving for the turn. If the character has stopped within striking range of an enemy, the **Attack** icon is automatically highlighted; if no opponent is in range, **Hold** is highlighted. (See page 7 for details on turning the **Battle Guide** Auto function ON/OFF.) Press the D-Pad to highlight menu icons, and **A** or **C** to select the flashing icon. Press **B** to return to the Move stage of the battle turn. The following icons are available in the main Battle Commands menu:

ATTACK

Attack lets the character use a weapon to attack an enemy within range. Press **C** to **Attack**, and the D-Pad to move the Halo cursor onto the desired target.

MAGIC

Selecting this icon displays the Magic screen for the character, allowing him/her to cast a spell during that battle turn. See page 14 for spellcasting pointers.

ITEMS

Select this icon to display the **Item** menu. The character can use, transfer or equip items as in the Town Item menu on page 8.

HOLD

Select this icon to finish the character's turn without performing an action. This icon is sometimes replaced by one of the special battle icons, below.

TALK

When you meet up with potential allies, the **Talk** icon appears, letting you make their acquaintance, even during battle. Press **C** to **Talk** to the character.

ENTER MAP

Some battlefields have additional hidden areas. This icon appears when a character stops at the entrance to such an area. Press **C** to **Enter** the area and end your turn.

✠ HALO CURSOR MODE ✠

- Z** to move the cursor onto the next character in order

Position the Halo over an unoccupied square and press **A** or **C** to display the Battle Commands submenu. You can access any number of submenu commands without ending the battle turn.

STATUS

Calls up the main Status screen for all party members participating in the fight. See pp. 12-13 for information on the Status screens and subscreens.

ADVICE

Select this icon for strategic **Advice** on the current battle from your party advisor. Pay heed – the counsel he gives may be crucial to your success.

MAP

Select this icon to display a **Map** of the entire battlefield. Characters in your party are shown as green dots, enemy forces as red.

SAVE

Select this icon to **Save** your game data. After saving the data file (see page 11), you are given the choice to continue the fight, or quit.

✠ BATTLE FEATURES ✠

The *Shining Force III* battle system includes some unique features that may well influence the outcome of any fight. These tactical effects, described below, are determined by a character's location and choice of opponent. Used wisely, they can boost defense, reward teamwork, and increase the amount of damage done by attacks. Study the way positioning, cooperation and weapon use generate different effects, and keep them in mind when you plot out your plan of attack.

LAND EFFECTS (LE)

Battlefield terrain can affect a character's Defense rating. The land effect of a battle grid square is shown as a percentage in a box marked **LE**, to the left of the character information window. The character's defense rating is raised by the percentage shown. Study the land effects for different kinds of terrain, and move your characters to gain the best positions on the field.

SUPPORT EFFECTS

Over the course of the game, party members develop close bonds of friendship and loyalty. These strong ties generate support effects, which come into play when characters with a close friendship are positioned on adjacent battlefield squares. There are many types of support effects, determined by the relationship between the two characters involved. A small icon appears over the character's head when a support effect is active. To check the support effects and friendship levels for a character with other party members, see the Friendship Status subscreen on page 13.

WEAPON EFFECTS

Weapons in one class may be stronger or weaker when used against weapons in another. For example, swords are effective against axes, but weak when used against spear-type weapons. A "!" mark appears over the head of an enemy who is especially vulnerable to attack by the active character's weapon. Attacks against such opponents do more damage, and have a higher chance of executing a Special Attack. See page 21 for a list of the weapon effects of the different classes of weapons.

WEAPONS AND SKILLS

“I’ve been in this business a good long time, and I’ve seen just about every kind of battle hardware known to man. You could say I know a thing or two about weapons. One thing I can tell you is, different weapon types are suited to different classes. You can’t expect a wizard to pick up a sword and start swinging away – it’s like putting boots on a fish and asking him to tapdance. As ugly a sight as ever I hope to see.”

“But put the right weapon in the right hands, and sparks will fly. As fighters gain experience with their weapons of choice, they can master special attack techniques that deliver extra damage or multiple hits to an unlucky foe. There’s no telling when these special attacks will be delivered – think of them as a boon from the God of War. One thing is certain though, the more a character uses the same weapon type in combat, the deeper their arsenal of special attacks becomes.”

“The next page shows a list of some of my favorite weapons. Come and see me at the weapon shop if you need help finding the perfect fit.”
